

Diamond  Vogel®

Paramount Exterior

ACRYLIC LATEX

Paramount offers outstanding results and long-lasting performance for exterior siding, trim, and doors.

Formulated for use on new or previously painted residential or commercial applications, Paramount Exterior provides a durable finish on wood, hardboard, vinyl siding, cement board, aluminum, galvanized metal, and masonry surfaces down to 35°F.

Application, Appearance, and Performance

Paramount Exterior Acrylic Latex delivers exceptional performance, offering extraordinary fade resistance and durability providing years of protection. It can be applied by airless spray. When coupled with enhanced brush and roll techniques, its application properties are unsurpassed. Paramount Exterior allows for application in low temperature conditions, as cool as 35°F, maximizing application flexibility and extending the painting season. It is perfect for both residential and commercial projects.

Finish	0-5 @ 85°	15-25 @ 60°
Resin Type	Acrylic	
Dry Time to Touch	30 minutes to 2 hours at >50°F and 50% Relative Humidity 2 to 4 hours at 35°F to 49°F and 50% Relative Humidity	
Dry Time to Recoat	2 to 4 hours at >50°F and 50% Relative Humidity 24 hours at 35°F to 49°F and 50% Relative Humidity	
Recommended Dry Film Thickness per Coat	1.5 to 2.0 mils	
Practical Coverage at Recommended DFT	280 to 374 ft ² /gallon	
Solids by Volume	35%	
VOCs	See Technical Data Sheet	

OUR FAMILY'S COMMITMENT TO YOU

Our founder, Andrew Vogel, decided that the only paint good enough for the barns and homes in the varied and often harsh Midwest climate was paint he perfected himself. So in 1926, from a modest "workshop laboratory," a paint company was born. Four generations, seven manufacturing

facilities, 53 paint stores, and millions of gallons of paint later, we are still as stubborn. We still insist on perfecting our own formulas, producing and distributing our own products, and servicing our customers with the kind of passion and commitment worthy of Andrew's name.
